

Nitrous Oxide Sedation Consent Form

Our office offers nitrous oxide sedation also known as "laughing gas". Nitrous Oxide sedation is a great way to take the edge off of the stress of coming to the dentist. It is also a good option for patients that want sedation but want to drive themselves home or back to work. Nitrous Oxide does not have a "hangover" effect. After the dental procedure is over, Dr. Campbell will continue to administer oxygen. About 10 to 15 minutes later, the nitrous oxide is eliminated from the body, and you are safe to drive. We will ask you to remain in the office until you feel comfortable to leave.

Our fee for Nitrous Oxide Sedation is **\$60.00**. This fee is a per "visit fee".

If you have any questions about Nitrous Oxide Sedation or other sedation options please feel free to ask any of our staff.

Yes. I would like to use Nitrous Oxide sedation for my appointment today.

Maybe. I would like to discuss sedation options with Dr. Campbell.

No, Thanks.
